

FIG. 1

This diagram shows a cross-sectional view of a second embodiment of the device. It features a central cavity with a top surface and a bottom surface. The top surface is defined by a horizontal layer (25) and a vertical layer (26). The bottom surface is defined by a horizontal layer (25) and a vertical layer (26). The vertical layers (26) are positioned on the left and right sides of the cavity, and the horizontal layers (25) are positioned at the top and bottom of the cavity. The vertical layers (26) are shown with a hatched pattern, indicating they are solid components. The horizontal layers (25) are shown with a solid line, indicating they are also solid components. The central cavity is empty.
